

Lunch Account Set Up.

The District has recently upgraded the student lunch program. One of the benefits of the new system is improved parental access. In order to gain access to your student account you will need to create an account on two separate systems. The first system is called the Chalkable Cafe. This allows you to view account balances and review the purchases of your child. The first link below is to the webpage to begin the registration process. The second link is the instructions for creating an account. You will need the following information to create the account.

- Building of Attendance
- First Name
- Last Name
- Student ID# *Please note the student ID number is available from the STI portal and will look like S#####.*
- Birth Date

One of the features of the new system, is there is now the ability for a parent to add funds to the students account directly. This will require an account set up through E-funds for Schools.

The first link below is to create an account for E-Funds for Schools and the second link are the instructions for doing so.
